

Study of Polygons and Exterior Angle Property

MODEL - AK SPEAP

MAKE - AK LABS

The Study of Polygons and Exterior Angle Property Kit is an educational kit designed to teach polygon geometry through hands-on activities. It helps students explore polygon classification, exterior angles, and geometric relationships while developing logical reasoning and mathematical skills.

KIT SPECIFICATION

Experiment	Study of Polygons & Verification of Exterior Angle Property
Subject	Mathematics & Geometry
Learning Areas	Polygon Classification, Interior & Exterior Angles, Geometric Properties
Components	Polygon Models, Angle Measuring Tools, Activity Materials & Educational Accessories
Material	Durable, Educational Grade Components
Application	Mathematics Practicals, Geometry Activities & STEM Learning
Suitable For	Schools, Colleges, Mathematics Laboratories & Educational Institutions

KIT DETAILS

The **Study of Polygons and Exterior Angle Property Kit** enables students to investigate different types of polygons and verify the exterior angle property through practical activities and geometric models. It strengthens concepts of interior and exterior angles, polygon classification, and geometric reasoning using interactive learning

materials. Ideal for mathematics laboratories, classrooms, and STEM education.
