

Identification of Different Types of Blood Cells

MODEL - AKBIO004

MAKE - AK LABS

The Identification of Different Types of Blood Cells Kit is an educational biology kit designed to study blood cell morphology through microscopic observation. It helps students identify red blood cells, white blood cells, and platelets using practical laboratory activities.

KIT SPECIFICATION

Product Code	AK-BIO-004
Product Name	Identification of Different Types of Blood Cells Lab Kit
Subject	Biology
Suitable For	Class 9-12
Practical	Identification of Red Blood Cells, White Blood Cells & Platelets
Application	Schools, Colleges & Biology Laboratories
Packaging	Durable Storage Box with Essential Laboratory Accessories

KIT DETAILS

The **Identification of Different Types of Blood Cells Kit** enables students to observe and identify red blood cells (RBCs), white blood cells (WBCs), and platelets using prepared slides and laboratory equipment. It strengthens understanding of blood cell structure, functions, and microscopic identification while developing practical observation skills. Ideal for schools, colleges, biology laboratories, and STEM-based science education.
