

Mathematics Senior Kit

MODEL - AKMS02

MAKE - AK LABS

The Mathematics Senior Kit is an educational mathematics kit designed to strengthen advanced mathematical concepts through hands-on learning. It helps students understand algebra, geometry, trigonometry, coordinate geometry, mensuration, probability, and statistics using practical activities.

KIT SPECIFICATION

Kit Name	Mathematics Senior Kit
Subject	Mathematics
Learning Areas	Algebra, Geometry, Coordinate Geometry, Trigonometry, Mensuration, Probability, Statistics, Data Handling
Components	Geometrical Models, Coordinate Board, Fraction and Algebra Models, Measuring Instruments, Probability Tools, Graph Sheets, Mathematical Manipulatives, Activity Guide
Material	Durable Educational Plastic, Wood, Metal and Printed Learning Materials
Application	Mathematics Practicals, Activity-Based Learning and STEM Education
Suitable For	Secondary Schools, Senior Secondary Schools, Mathematics Laboratories, Educational Institutions and Learning Centers

KIT DETAILS

The **Mathematics Senior Kit** provides comprehensive learning materials for exploring advanced mathematical concepts through activity-based education. Students perform practical activities related to algebra, geometry, coordinate geometry, trigonometry, mensuration, probability, statistics, and data handling. The kit enhances logical reasoning, analytical thinking, and problem-solving skills. Ideal for secondary and senior secondary schools, mathematics laboratories, and STEM-based learning environments.
