

HS Astronomy Lab Kit

MODEL - AK HSALK

MAKE - AK LABS

The HS Astronomy Lab Kit is a comprehensive educational kit designed for higher secondary astronomy and space science learning. It includes models, observation tools, and activity materials to help students understand celestial bodies, planetary motion, eclipses, constellations, and astronomical concepts through practical exploration.

KIT SPECIFICATION

Kit Type	Higher Secondary (HS) Astronomy Lab Kit
Subject	Astronomy & Space Science
Experiments Covered	Solar System, Eclipses, Planetary Motion & Constellations
Components	Astronomy Models, Charts, Observation Tools & Accessories
Material	Durable, Educational Grade Components
Application	Higher Secondary Astronomy Practicals & STEM Learning
Suitable For	Higher Secondary Schools, Colleges & Astronomy Laboratories

KIT DETAILS

The **HS Astronomy Lab Kit** is a complete laboratory solution developed for higher secondary astronomy education. It contains astronomy models, celestial charts, observation accessories, and experiment materials for studying the solar system, planetary

motion, eclipses, constellations, and celestial phenomena. Designed as per curriculum standards, it promotes hands-on learning, scientific observation, and space science education.
